

Liberty Plan

Hybrid Aggregation Product Summary

Historically the purchase of fixed priced electricity contracts has best been completed in the fall & spring months. This is mostly because these shoulder months are influenced by neither the high power consumptions associated with the summer cooling season nor the winter heating demand which historically puts pressure on the natural gas markets. These months, typically March and October, are the times we recommend fixing in electricity prices. Over time Patriot Energy has consistently proven that the purchasing of large aggregated blocks of power results in price breaks for our customers. We have created the Patriot Energy Liberty Plan for this reason.

The Liberty Plan is a Hybrid Aggregation Plan designed to take advantage of the pricing advantages associated with large blocks of power and the timing of these blocks to be priced in the spring & fall shoulder months. As a member of the Liberty Power Pool, you will receive market pricing, similar to the utility's SOLR Service, through the summer or winter seasons. As more customers join the Liberty Power Pool, and we approach the shoulder seasons, Patriot Energy will price the entire group and offer each customer the fixed discounted rate. We will not know the fixed rate as we enroll new customers in the plan so each customer will have the ability to "opt out" of the group fixed price for any reason and remain on our market Independence Plan, or if they choose, pursue their own fixed price through our Freedom Plan.

Initial: _____

Features & Benefits

Aggregate Block Fixed Pricing in Shoulder Month Terms through Dec. 2008 & Dec. 2009
 Independence Plan through Nov / March
 Freedom Plan from Nov / March thru end of term
 Customer may choose to "opt out" of fixed portion
 Subject to credit approval

Independence Price Calculation

$NE\text{-}ISO \text{ Index} + \text{Retail Adder} = \text{Independence Price}$
ex: 7.9 cents + 1.93 cents = 9.83 cents

Retail Adder includes the variable components of capacity, renewable energy, ancillary services & losses along with fixed administration costs.

The term "NE-ISO" represents the hourly and/or day ahead clearing price as posted by the NE-ISO. Patriot Energy Group, Inc. shall assess an early termination penalty calculated by multiplying the historical average monthly usage as depicted on the utility bill by the remaining months of the term by \$.005. Additional penalties and other fees may apply upon breach per supplier contract(s).

Patriot Energy neither represents nor guarantees that this plan will result in higher or lower costs in the future when compared to the utility's Basic Service price. This document is not a contract for electric supply and Patriot Energy does not warrant the terms above fully or accurately represent the terms of actual electric supply.
