

# Philadelphia Plan

## Managed Portfolio Service

The Patriot Energy Philadelphia Plan is a comprehensive managed electricity portfolio consisting of interval metered customers participating in the New England-ISO market. Similar to a managed equity mutual fund, Patriot Energy portfolio administrators actively manage the Philadelphia portfolio by positioning portions of the load in fixed priced financial hedges. The goal of the plan is to consistently produce a lower overall cost to the individual accounts or aggregated group when compared to the utility's Basic Service.

## General Features & Benefits

Customer Managed Service  
 Peak, Off Peak & ATC (Around the Clock) Hedging  
 Aggregation "Block" Pricing Advantage when applicable  
 Customer admission is subject to Credit Approval

Portions of the Philadelphia Plan include fixed hedges and may be subject to early termination penalties calculated per the underlying supplier contract and may include liquidation damages and/or other fees. Patriot Energy shall assess an early termination penalty calculated by multiplying the historical average monthly usage as depicted on the utility bill by the remaining months of the term by \$.005.

**Patriot Energy neither represents nor guarantees that this plan will result in higher or lower costs in the future when compared to the utility's Basic Service price. This document is not a contract for electric supply and Patriot Energy does not warrant the terms above fully or accurately represent the terms of actual electric supply.**
